@NicHulscher

🚨HUNDREDS of studies now confirm that COVID-19 “vaccines” are one of the LARGEST carcinogenic exposures in history.

They:

← **Post**

2. Integrate into human genomes
3. Disrupt THOUSANDS of critical genes
4. Drive genome instability
5. Enable tumor immune escape
6. Suppress DNA repair mechanisms
7. Drive chronic inflammation
8. Cause immune dysregulation (↓T-cells, ↓type I IFN)
9. Disrupt microRNA networks controlling growth/apoptosis
10. Activate oncogenic signaling (MAPK, PI3K/AKT/mTOR)
11. Remodel the tumor microenvironment
12. Reactivate dormant cancers
13. Block innate immune sensing (TLR inhibition)
14. Produce aberrant proteins (frameshift errors)
15. Induce immune exhaustion
16. Promote IgG4 class switching
17. Contain plasmid DNA including SV40
18. Disrupt RAS signaling
19. Damage the microbiome
20. Increase treatment resistance

Nicolas Hulscher, MPH @NicHulscher · Dec 30, 2025

COVID-19 VACCINE-INDUCED TURBO CANCER

An unusually aggressive, rapidly progressing malignancy marked by sudden relapse or new onset at advanced stage — often in the young.
